

TEXGEN GROUP WEBSITE MODERNIZATION

DEVELOPER BUILD BRIEF

Existing Site: texgengroup.com — Prepared by Codinism Inc

1. Project Overview

Codinism Inc (“Developer”) will redesign and modernize the existing Texgen Group website (texgengroup.com) for Texgen Group (“Client”). The current site is a PHP-based corporate site covering the company’s manufacturing operations, certifications, and product lines; this project preserves its existing sitemap and content while modernizing the visual design, responsiveness, performance, and back-end manageability.

Goal: a faster, mobile-first, easy-to-update corporate website that reflects Texgen Group’s scale and manufacturing experience, with a modern content management system so Client’s team can update pages, news, and gallery content without developer involvement.

1.1 Current Site — Structure to Be Preserved & Modernized

- Home — hero/intro, company overview, factory process summary, certifications, stats, latest news
- About — Management, About Us
- Factory — Knitting, Sample & Development, Cutting, Sewing, Finishing, Testing Lab, Store
- Product catalog page
- Sustainability page
- Image Gallery
- Career page
- CSR (Corporate Social Responsibility) page
- Blog / news posts
- Contact page

2. Scope of Work

2.1 Included Deliverables

- Modernized visual design (homepage + up to 10 inner-page templates covering the existing sitemap) refreshing Texgen Group’s current branding
- Rebuild on a modern, maintainable framework/CMS (to be confirmed with Client) replacing the current static PHP templates
- Fully responsive layout for desktop, tablet, and mobile
- Migration of existing content: About, Management, Factory sub-pages (Knitting, Sample & Development, Cutting, Sewing, Finishing, Testing Lab, Store), Product, Sustainability, CSR, Career, Contact
- Modernized certifications section (GOTS, WRAP, OEKO-TEX, Sedex, GRS, amfori, TQCSI, etc.) with logos/badges
- Image gallery rebuild with lightbox/gallery viewer
- Blog/news section rebuild with categories and an easy-to-use CMS editor

- Video embed support (factory video, etc.)
- Contact form and Career/application form wired to Client email
- Company stats section (employees, production volume, sewing lines, etc.) with modern presentation
- Basic SEO setup (metadata structure, sitemap.xml, page speed optimization)
- Social media links (Facebook, etc.)
- Cross-browser and cross-device QA testing
- Staging site for Client review prior to launch
- Launch/deployment to Client's existing hosting or a new host of Client's choice
- 1 month (30 days) of post-launch support after final delivery, covering bug-fixes and minor adjustments to Developer-built functionality (not new features)
- 1 hour of admin/CMS training for Client's team (live or recorded walkthrough)

2.2 Not Included (Out of Scope)

- New copywriting, translation, or new photography/videography (existing Client content and assets will be reused/migrated unless new material is requested as a paid add-on)
- E-commerce, online store, or payment functionality
- Multi-language support unless separately scoped
- Ongoing hosting, domain, SSL, or third-party app/plugin subscription fees (billed directly to Client by those providers)
- ERP, inventory, or production-system integrations
- Paid marketing, SEO campaigns, or ongoing content management after the support window
- Legal/compliance review of Client's Terms & Conditions or Privacy Policy

3. Revisions & Change Orders

This scope includes up to two (2) rounds of design revisions and two (2) rounds of pre-launch development revisions. Requests that expand scope beyond Section 2.1 (additional pages, features, integrations, or content volume) require a written Change Order before work proceeds.

4. Client Access & Inputs Needed to Start

- Access to existing texgengroup.com hosting, domain registrar/DNS, and any existing CMS or source files
- Confirmation of which existing content, images, and certifications carry over as-is versus need updating
- A single point of contact authorized to approve deliverables
